

## Case Study

# PhagoMed advances phage therapy with eLabJournal

*“eLabJournal is the cornerstone of our documentation processes.”*

## PhagoMed Biopharma GmbH

PhagoMed Biopharma GmbH is an Austrian biotech company focused on the development of human therapeutic applications of phages and phage-derived proteins. Currently, PhagoMed has three active development programs in the fields of periprosthetic joint infections, urinary tract infections and bacterial vaginosis. These development programs are based on the experiences of its clinical co-founders with last-resort treatments, as well as research collaborations with highly prestigious

scientists and research institutions in Germany and Belgium. Since its incorporation in November 2017, the company has raised more than €6.5 million in private investments and public grants. PhagoMed has a team of fifteen highly skilled scientist working on its programs, eleven of which at the Campus Vienna Biocenter in Vienna, Austria.

## Goal

Develop robust phage-based pharmaceuticals that are validated in rigorous clinical trials and immediately applied to the treatment of patients in need.

**Lorenzo Corsini**  
CEO, Research and Development

**“eLabJournal is the cornerstone of our documentation processes. We use it to document experiments and protocols, manage biological samples, organize our -80 freezer, print labels, and even order consumables - essentially using all of the features it offers. Clean documentation is the basis for reproducible research and progress in commercial R&D.”**

## Challenge

*How to share ongoing research with new and current employees as the company grows*

PhagoMed is growing rapidly in size and complexity. Our hard-working scientific team needs instant, totally reliable access to all documentation and lab management functions. And new team members must be onboarded quickly and effectively, both to use existing documentation and to integrate their own new experiments. We can't wait; they must become fully productive almost overnight! To achieve these requirements, the lab journal system had to be simple to implement and quick to learn.

## Solution

*eLABJournal makes PhagoMed lab data and information safe, secure, and reliable*

Over 20.000 scientists throughout the world have installed eLabJournal products in their bioscience laboratories since they were first introduced in 2010. The functionality and capability of the systems is constantly evolving, given direct feedback from users through the active, involved eLab team. Mature systems,

widely deployed around the world, give our users the peace of mind they need to sleep at night.

## Result

*PhagoMed focuses on saving lives by defeating drug-resistant bacteria*

PhagoMed research is moving fast with focus and precision, aided by the clear documentation and management of the research process provided by the eLabJournal family of products. eLab scales seamlessly to meet the needs of the growing PhagoMed team and expanding research activity.

## About eLabJournal

eLabJournal offers an intuitive and flexible solution to manage information in your lab. The all-in-one Electronic Lab Notebook also includes modules for sample tracking and protocol management. eLabJournal improves efficiency when documenting, organizing, searching and archiving data, samples and protocols. The software is suitable for any lab ranging from small academic laboratories and start-up companies to large academic institutes and globally operating companies.
